The International Year of Astronomy 2009

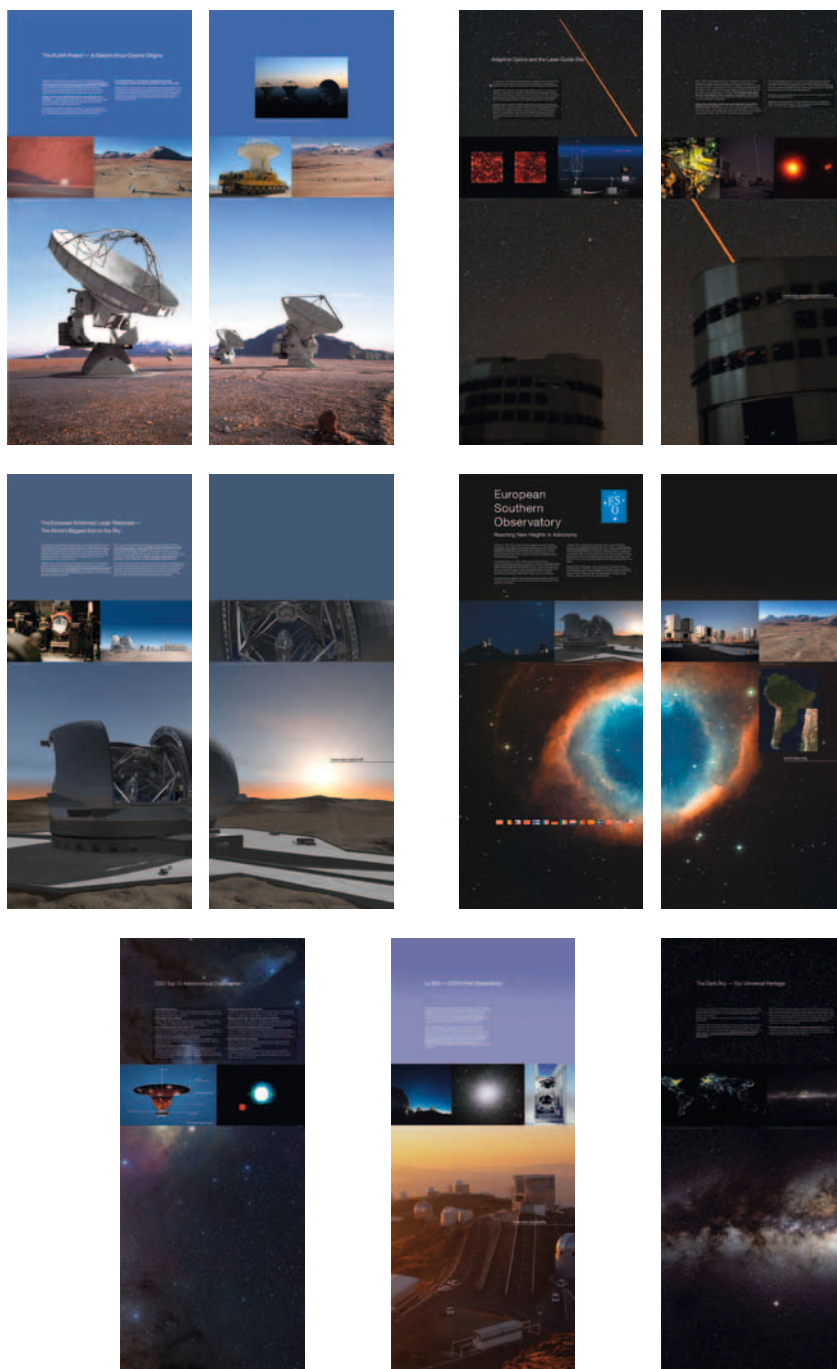

Exhibition Panels

To help the work of communicators wishing to create an exhibition area or to decorate their walls, the ESO education and Public Outreach Department has created a series of beautifully illustrated 90 cm × 213 cm exhibition panels available, free of charge, in electronic form.

The themes of the panels cover the following topics: ESO as an organisation; the La Silla Observatory; the Very Large Telescope; the ALMA and E-ELT projects; the principles of adaptive optics and the laser guide star; scientific highlights; as well as amazing astronomical image panels.

The high resolution files can be downloaded from: <http://www.eso.org/public/outreach/products/exhibitions/>

About ESO

ESO, the European Southern Observatory, is the foremost intergovernmental astronomy organisation in Europe. It is supported by 14 countries: Austria, Belgium, the Czech Republic, Denmark, France, Finland, Germany, Italy, the Netherlands, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

ESO carries out an ambitious programme focused on the design, construction and operation of powerful ground-based observing facilities enabling astronomers to make important scientific discoveries. ESO plays also a leading role in promoting and organising cooperation in astronomical research.

ESO operates three unique world-class observing sites in the Atacama Desert region of Chile: La Silla, Paranal and Chajnantor.
